

SANGOLA MAHAVIDYALAYA SANGOLA
DEPARTMENT OF COMPUTER SCIENCE AND APPLICATION
B.C.A, B.Sc(ECS), B.Sc(CS)- III SEM-VI-2025-26
Subject – ASP.Net Core MVC

Practical /Journal Assignment-02

1. Create a **Student Registration Form** using HTML Helpers:
 - TextBox (Name)
 - TextArea (Address)
 - DropDownList (Course)
 - RadioButton (Gender)
 - CheckBox (Hobbies)
 - Password (Password field)
 - Hidden (StudentId)
2. Create a **Custom HTML Helper** for generating a styled button.
3. Create a Login form using HTML Helpers with validation.
4. Demonstrate different ways to generate links in ASP.NET Core MVC:
 - Html.ActionLink()
 - Url.Action()
 - Anchor Tag Helper
5. Create a form using **Form Tag Helper** and submit model data.
6. Use the **Image Tag Helper** to display images from wwwroot folder.
7. Create a navigation menu using **Anchor Tag Helper**.
8. Create and use a **Partial Tag Helper** for reusable UI components.
9. Create a **Custom Tag Helper** that formats text in uppercase.
10. Implement **Cache Tag Helper** to cache a section of the page.
11. Create a model class Employee_Registration using Data Annotation attributes:
 - Required
 - StringLength
 - Range
 - EmailAddress
 - Compare
12. Implement **Custom Data Annotation** to validate Entered number must be EVEN only.
13. Implement **Blacklist and Whitelist validation** using Data Annotations.
14. Demonstrate Display and Formatting attributes:
 - Display(Name)
 - DataType
 - DisplayFormat

15. Demonstrate use of **Cookies** to store user state.
16. Implement **Encrypted Cookies** in ASP.NET Core.
17. Implement **Session Management** to store user login details.
18. Create functionality to **Upload a Single File**.
19. Recreate previous application with Restrict uploaded file size (e.g., max 2MB) .
20. Recreate previous application with Restrict uploaded file type (only .jpg, .png, .pdf).
21. Create functionality to Upload Multiple Files and display them.
22. Export data from database to **Excel File**.
23. Generate a PDF report from Model Class data.
24. Create an application to Implement full **CRUD operations** for Student entity:
 - Insert
 - Select
 - Update
 - Delete
25. Create an ASP.NET Core MVC application to demonstrate Data Annotation Attributes in EF Core.
26. Create an ASP.NET Core MVC application to demonstrate Code First approach in EF core.
27. Create an ASP.NET Core MVC application to demonstrate DB First approach in EF core.
